

# Synergy Marine International OK Dinghy Autumn Press Release

After a successful first year for the Synergy Marine International OK with multiple open meeting and a British National Championship win our successes have continued into 2013. 2013 has seen more open meeting wins and a very competitive showing at the 2013 World and European championships.

The very light wind 2013 European Championships in Carnac demonstrated the designs ability in the lower wind range with Lee Child and Jim Hunt putting in some very good results. The Dave Rose (Skipper) designs' credentials were known to be very good when the wind picks up having won a breezy European Championship in 2002. But the hull shape is continuing to prove that it is a great all round design that can carry a wide weight range competitively. Now that Synergy is building the design using modern Epoxy FRP techniques the boats are not only stiffer, lighter and stronger but more importantly quicker!

## Autumn 2013 New Boat Offer

Order a new, ready to trail away and race, Synergy International OK for the 2014 season before 31<sup>st</sup> December 2013 for £9495. Normal price £10,431.

For our full International OK price list visit this link [http://bit.ly/ok\\_price\\_list\\_autumn\\_2013](http://bit.ly/ok_price_list_autumn_2013).

## Synergy OK Mast Development Update

This year we started development of our new OK carbon masts. The first two masts are already in use and are proving competitive with the first "soft" prototype finishing 11<sup>th</sup> at the 2013 British Nationals and winning a race at the Ardleigh open meeting. The development of the masts will continue this winter as we further develop our laminate specification and mast bend database. Our intention over the winter is to finalise the bend characteristics for soft, medium and stiff section masts to suit OK sailors across the weight spectrum.

We anticipate building a further 3 to 4 development masts over the winter for testing. If you would be interested in purchasing one of these development masts at a bargain price of £1200 ex delivery or have any questions about our masts then please contact by email or phone on the number below.

## About Synergy Marine

Synergy Marine was founded in January 2010 by OK and Lark sailor, Simon Cox, as a boat building and repair centre on the East Coast of England. The business has CNC router facilities for manufacture of parts including moulds, rudders and centreboards for all sailing dinghy classes. We work with wood, glass fibre and carbon composites. We have produced championship winning dinghies and parts for multiple classes every years that we have been operating.
